L 000	Initial Comments  An licensure survey was conducted January 11, 2011 through January 19, 2011. The following deficiencies were based on observations, record review, staff and resident interviews. The sample included 16 residents based on a census of 77 residents on the first day of survey and 61 supplemental residents. An Immediate Jeopardy at CFR 483.25 (H) (I) and (2) Accidents and Supervision was identified on January 18, 2011 at 3:13 PM. The allegation of removal of the IJ situation was received and verified on January 18, 2011 at 6:05 PM and the Immediate Jeopardy was lifted at this time.	L 000		
L 051	3210.4 Nursing Facilities  A charge nurse shall be responsible for the following:  (a) Making daily resident visits to assess physical and emotional status and implementing any required nursing intervention;  (b) Reviewing medication records for completeness, accuracy in the transcription of physician orders, and adherences to stop-order policies;  (c) Reviewing residents' plans of care for appropriate goals and approaches, and revising them as needed;  (d) Delegating responsibility to the nursing staff for direct resident nursing care of specific residents;  (e) Supervising and evaluating each nursing employee on the unit; and	L 051	1. The Inter Disciplinary Team (IDT) will develop a Care Plan for Resident #5 for the use of multiple anticoagulants. The IDT will initiate a care plan for the potential drug interaction for the use of nine or more medications for Resident #7. The IDT will develop a care plan will for potential adverse drug interactions with the use of nine or more medications for residents #8 The IDT will initiate a care plan for the potential drug interaction for the use of nine or more medications for Resident #12. The Facility will initiate a care plan with appropriate goals and approaches for Resident # E1 who is on C-PAP. The Facility will initiate a care plan with appropriate goals and approaches for allergies Penicillin and Lisinopril for Resident # E1.  2. All other residents were check that may be affected be this deficient practice and the appropriate care plan will be developed for compliance if needed.

The tray table, an electric heater, and a extension cord was also removed. The marred walls were repaired.  The malodorous smell that was evident in in room #756 cleaned and removed.  The two bottles of eye wash solution that were expired as of 11/06/10 located in the soiled utility room on the seventh floor were replaced with current solution.		
L 421	3256.12 Nursing Facilities  Each building, each piece of equipment, and the grounds shall be regularly maintained and attended. This Statute is not met as evidenced by:  Based on observations made during the environmental tour of the facility on January 11 thru January 18, 2011, it was determined that facility staff failed to maintain essential patient care equipment in safe operating condition including: a broken wall clock in one (1) of 13 resident 's rooms, one (1) of one (1) non-operable bedside scale with a missing pad, loose bed side rail, rusty and leaking city inlet valve in physical plant, and non-functioning pulse oximeter.  The findings include:  1. The wall clock was broken and needed to be replaced in room #618. These observations were made in the presence of Employees #1 and #19. They both acknowledged this finding at the time of the observation during the survey.  2. The bedside scale for the sixth and seventh floor was missing a pad and could not be used.	L 421	The wall clock that was broken in room #618 was replaced.  2. All other resident rooms, hallways and common areas were checked for clutter, burned out light bulbs, dust, odors and marred walls. When these deficient issues were found, they were corrected. 3. The Director of Housekeeping or designee will do weekly environmental round to ensure that these deficient issue do not recur.

L 421	Continued From page 36  3. The right side rails were loose and in danger of falling off the resident ' s bed in room #638 and the left side rails were also loose.  4. The city inlet valve in physical plant was steadily leaking, was rusty and needed to be replaced. This observation was made in the presence of Employee #1 and #18 who acknowledged the finding during the survey.  5. Facility staff failed to maintain essential patient care equipment in safe operating condition. Resident #6.  Employee #9 was observed monitoring Resident #6's blood pressure and pulse ox prior to performing trach care. He/she was unable to obtain a pulse ox due to the finger pulse oximeter not functioning. The employee retrieved another blood pressure machine with a functional finger pulse oximeter. A pulse ox reading of 99% was obtained on January 14, 2011 at 11:35 AM.  A face-to-face interview was conducted with Employees #4 and #9 during the time of the observation. Both acknowledged that the finger pulse oximeter attachment to the blood pressure machine was malfunctioned and the pulse ox could not be obtained and a work order was entered for repair of the equipment. The observation occurred on January 14, 2011 at 11:25 AM.	L 421	1. The missing pad for the bedside scale for the sixth and seventh floor was found during the time of the survey. The loose side rails on the residents' bed in room #638 were tightened. The city inlet valve in the physical plant that was leaking and rusty was replaced. The pulse oximeter that was cited to be non functioning was taken out of service.  2. All other essential patient care equipment was checked for safe operating conditions. Any equipment not found to be in safe operating condition will be taken out of service and or replaced.  3. The DON or designee will in-service the nursing staff on identifying, documenting and taking out of service essential patient equipment not found in safe operating condition. The DON or designee will monitor this process for compliance monthly.  4. The findings from this monitoring will be reported to the Quality Assurance Committee Monthly times three (March, April and May 2011)	3/6/2011
